

## Technical Data Sheet for Enviro Vehicle Wash

### Enviro Vehicle Wash

Enviro Vehicle Wash is a completely biodegradable vehicle wash. It is phosphate free and contains no caustic soda or solvents, both of which are undesirable from a safety or environmental aspect.

Enviro Vehicle Wash is formulated with an advanced surfactant called Traffic Film Remover (TFR) which works extremely synergistically with standard detergents to wet out and cut through dirt, oil and grease.

An amphoteric surfactant has also been incorporated in Enviro Vehicle Wash to assist in grease cutting and to exert a powerful emulsifying action to keep soil in suspension and to promote free rinsing. Additional components are corrosion inhibitors and water softening agents for hard water.

A property of this detergent system is that static build-up is eliminated on paint work reducing dirt pick-up.

### Areas of use

Cleaning of trucks, buses, earthmoving equipment, cars, vans and motorcycles. Particularly suited to fleet cleaning because of its quick, efficient and economical in use properties. Ideal in use of areas with high dirt pick-up and high corrosion.

### Directions

High pressure spray equipment: Dilution of 1:40 parts water recommended.

Foam spray entire vehicle from the bottom up. Leave for 10 minutes for optimum penetration. Then pressure rinse from the bottom up with the nozzle outlet 15-30 centimetres from the vehicle. Final rinse at 3445 kPa (500 psi) pressure from top to bottom.

Manual application: Dilution 1:40 parts water in a bucket. Sponge, mop or brush vehicle with Enviro Vehicle Wash. Leave to stand for 10 minutes to allow soil penetration. Hose off.

### Properties

- Appearance: Clear, blue colour
- Non toxic
- Biodegradable

### Contains

- Traffic Film Remover
- Corrosion inhibitors
- Water softeners
- No phosphates, caustic soda or solvents

**Environmental Considerations**

Enviro Vehicle Wash is completely biodegradable. It is the vehicle cleaner of choice in environmentally sensitive areas.

**Safety and Handling**

No special precautions for storage.

Product is water based.

Safety glasses and gloves required.

Before using read the label and MSD sheet for Hazard Warnings and First Aid instructions.

**Packaging.**

5 litre containers

20 litre containers

200 litre drums

1000 litre transit tanks

Issued 23 December 2002
