

# ENVIRO Phosphate-Free Laundry Detergent

**ENVIRO  
PHOSPHATE-  
FREE LAUNDRY  
DETERGENT is  
a powerful &  
effective product  
designed to safely  
clean brightly  
coloured fabrics**

ENVIRO has developed this STPP free laundry product to reduce the impact of detergent use on the health of our waterways. This detergent is not only low impact, its also an excellent performer in the wash.

Sodium Tripoly Phosphate (otherwise known as STPP) has been an important ingredient in commercial laundry detergent since its invention. Unfortunately it is also very damaging to the environment, and is directly responsible for the algae blooms (particularly Blue Green Algae) that are choking Australian waterways.

STPP acts much like a fertilizer when it is dissolved in water & causes aquatic vegetation like algae to grow more prolifically than it would naturally. This results in reduced oxygen levels that are known to threaten fish and other aquatic life forms. Therefore, one of the best ways to ensure the health of our waterways is to reduce the amount of STPP we release.

ENVIRO Phosphate-Free Laundry Detergent is a powerful & effective product that contains no environmentally harmful STPPs. This detergent is not only environmentally friendly, it is also an excellent performer. It gives a brilliantly clean wash, it safely cleans brightly colored fabrics and penetrates even the most ground-in soils. By using the most modern, low impact surfactants ENVIRO can guarantee that our detergent will wash as well as standard detergents, while also reducing the impact of detergent use on the health of our waterways.

Pack size: 25kg
